Certificate for being in top six team in DUET Techfest - 2023

CERTIFICATIONS

Programming for everybody (Getting started with Python) - University of Michigan (Coursera)

Python Data Structures - University of Michigan (Coursera)

PROJECTS

WEBDIV
- An educational website for visualizing web designing. Here a user can select, drag and drop components of website and see the generated codes for that.

CODELABS
- Revolutionize learning with a collaborative coding platform. Teachers create interactive classrooms, enabling real-time, simultaneous coding between educators and students on a single, shared editor. Foster engagement, teamwork, and hands-on learning in every line of code.

MULTICARE INDIGO
- Multicare Indigo is a mobile app to help individuals in their emergency situation. At one press on SOS button, user can send an emergency message to his close relatives' phone number with his exact location using google map.

MINITECH
- MiniTech is a desktop application which provides IT professionals' different accessories. User can buy products and admin can add or delete products and visualize his income.
